

# DISPOSABLE TAG AND STRAP APPLICATION

## Step 1

Push the strap through the bottom slot on the chip, and position the chip directly over the “bow tie” section.

## Step 2

Now, place the strap snugly around your ankle with the tag on the **outside** of your ankle. Fasten the strap by placing one of the cutouts over the white pin, then folding over the small flap and snapping the circular plastic piece onto the pin over the strap.
